

Protect your facility, products, vehicles and people. ⚠️

## PROTECTIVE SOLUTIONS

A **safe warehouse** is a productive warehouse. It's where injuries decrease, morale soars, and efficiency peaks. By prioritizing safety, you protect your workers and secure the future of your business.

- 💡 Panels, posts, doors, and cages to restrict access.
- 💡 Bollards, safety barriers, column guards, and pedestrian barriers to protect against vehicle impacts, manage and control vehicular traffic, and for security purposes.
- 💡 Separating walls and cage solutions to create safe work zones.
- 💡 Pallet racks designed to prevent falling goods.
- 💡 Mesh shelving that allows for better visibility and reduces the risk of falling objects.
- 💡 Handrails and safety nets for fall protection.

Protect and prepare your racks with **Pallet Rack Repair Kits**, a better solution than replacing damaged uprights time and time again.
