Racks & Cages | Shelves | Partitions | Mezzanines | Conveyors
Modular Offices | Robots, Cobots & Autonomous Vehicles

Optimize Productivity

We are passionately committed to help you transform your warehouse into a hub of efficiency, productivity, and safety for your employees. Whether you're looking for innovative racking solutions, additional shelving, advanced automation systems, or robust material handling equipment, SUMMIT stands ready to provide seamless, turn-key solutions tailored to your needs. Our solutions will:

- ✓ Enhance material handling coordination
- ✓ Boost inventory control
- ✓ Improve customer service
- ✓ Reduce human error
- ✓ Improve workplace safety
- ✓ Minimize labor

And, empower your business to reach new heights of operational excellence. Let's unlock the full potential of your warehouse together!

Toyota's Automated Guided Vehicle (AGV) Core Tow Tractor provides automated towing operations while allowing manual control as needed. [v](#)

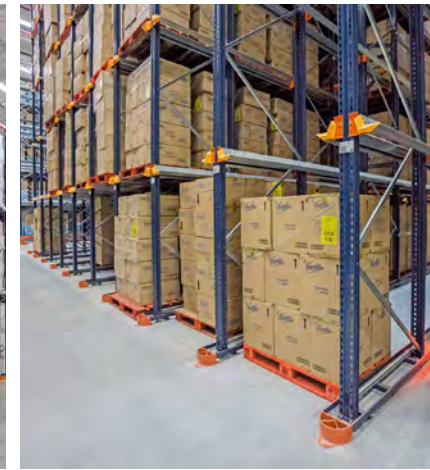

optimization & automation

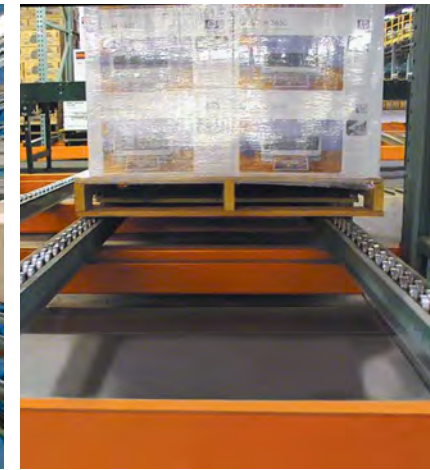

Storage Racks
Racks for boxes, pallets, and containers.

Pallet Racks
Drive-in, drive-thru pallet racks. The lower guide rails make it easier for forklifts to move inside the drive-in pallet racking.

Carton Flow Racks - FIFO
Wheel and roller platforms for visibility and faster configuration.

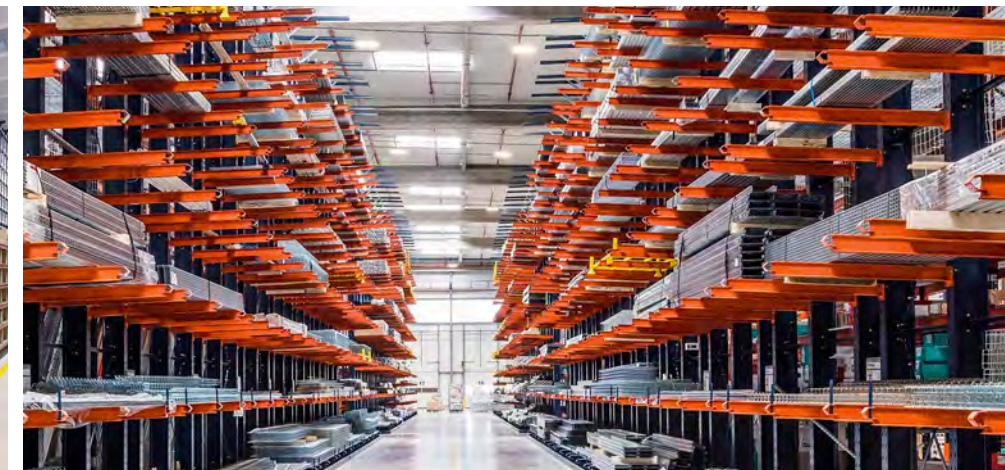

Pallet Flow Racks - FIFO
Precise pallet rotation.

Stretch Wrapping Systems
Turntable, rotary arm, orbital ring, semi-automatic and automatic systems.

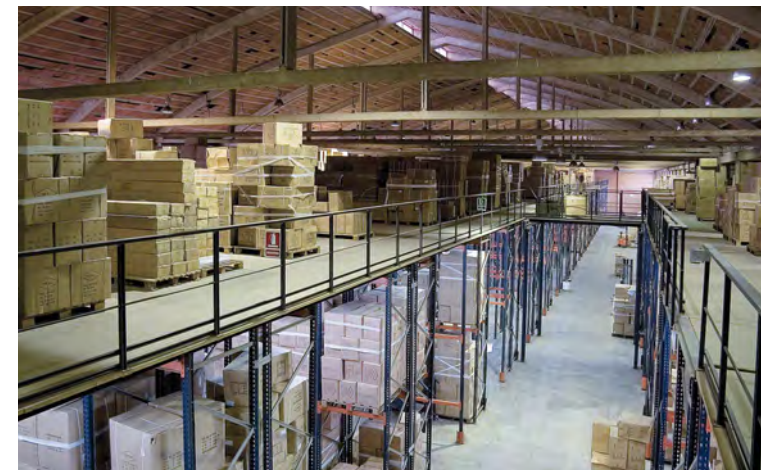

Shelving
Wide-span and narrow.

Cantilever Racks
Storage systems for long or bulky items.

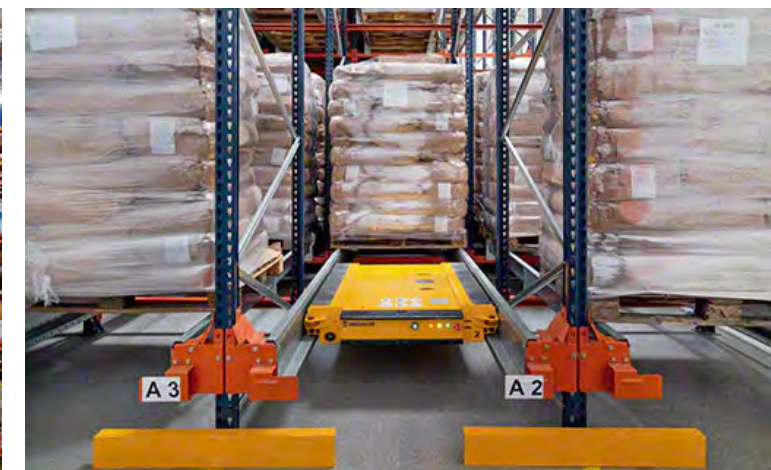

Roller Conveyors for Boxes, Totes and Bins
Easy order fulfillment. Low cost, low maintenance systems.

Mezzanines
Utilize overhead space and minimize disruptions to the working floor.

Mezzanine Racking Systems
Optimize vertical space by doubling or tripling usable space.

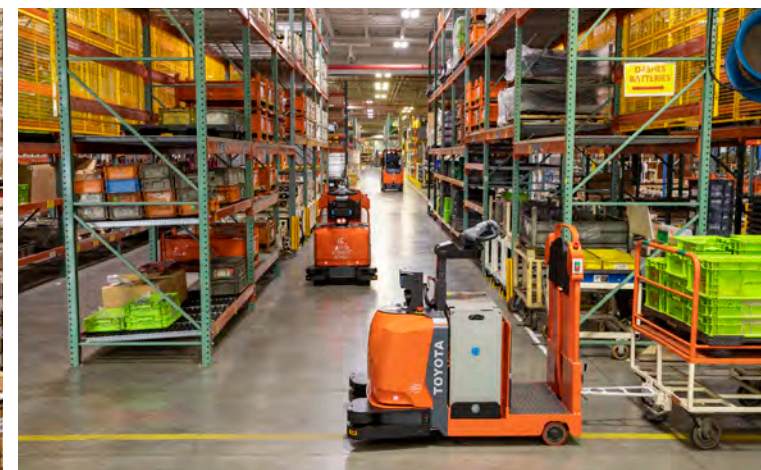

Pallet Shuttle
Semi-automatic electric shuttle loads and unloads pallets inside compact racks.

Conveyors
Eliminate bottlenecks and maximize productivity.

Robotics
Increase capacity and performance that scale with your needs.

Autonomous Vehicles
Transport boxes and containers, stack pallets, and move inventory autonomously.

Modular Offices, Clean and Grow Rooms
Elevate your warehouse with a Modular Office, or Grow Room. Enhance functionality by integrating a mezzanine, to maximize every inch of space.

Let's Get Started

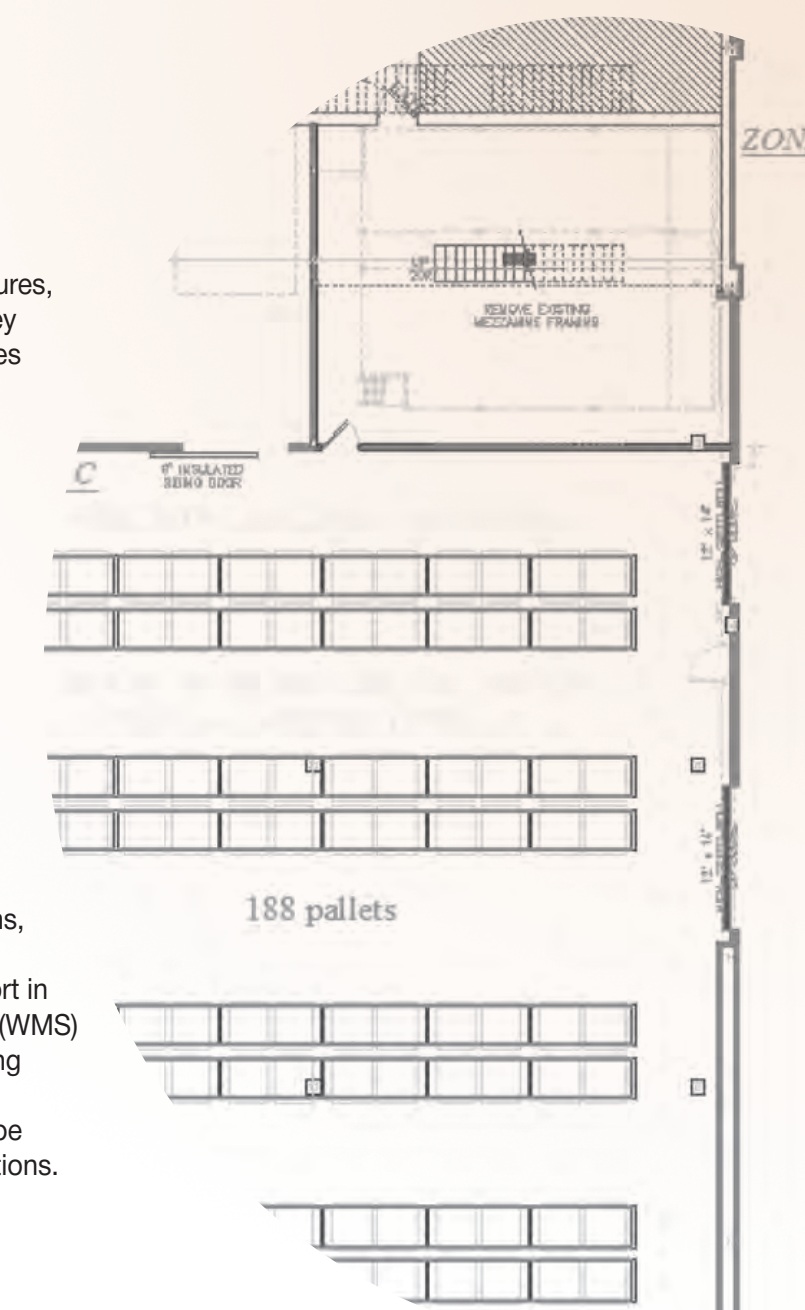

Our process begins with a **comprehensive evaluation** of your current operations, including your picking and packing procedures, resulting in a detailed feasibility study. We carefully consider key factors such as the size and layout of your warehouse, the types of goods you handle, your inventory volume, and your unique storage needs.

Armed with your structural drawings, we meticulously measure your warehouse space to **identify the optimal areas** for equipment placement and to ensure the **most efficient use of your available space**.

In many instances, we create **CAD layouts** that illustrate various options for rack systems, partitions, cages, mezzanines, and modular offices. Our expertise enables us to recommend the perfect combination of material handling equipment designed to **enhance safety** and **boost profitability** within your warehouse.

Through our **strong partnerships** with leading manufacturers of warehouse racking systems and automated storage solutions, we empower you to maximize product turnover and streamline your inventory management. We also provide invaluable support in implementing sophisticated warehouse management systems (WMS) to efficiently track inventory, direct picking, and manage packing and shipping tasks, all while coordinating material handling equipment seamlessly. Summit Handling Systems is proud to be an **award-winning** dealer of **top-notch** material handling solutions.

Our ultimate goal is to help you minimize human error and repetitive tasks, paving the way for **increased efficiency** and **exceptional productivity** in your operations.

Maximize Your Profit with Summit

Summit Warehouse Solutions is passionate about helping you discover the perfect racking solution tailored to your business needs. Our racking storage systems are expertly crafted with a focus on quality, ensuring safety, reliability, and durability for your warehouse operations. Whether your space is a compact warehouse or an expansive rack-supported building, our experienced team is committed to guiding you every step of the way, delivering solutions that empower your success.

We proudly operate five locations across the Northeast, staffed by a dedicated team of seasoned specialists ready to tackle your unique challenges.

With over 70 years of experience, Summit Handling Systems has earned its reputation as a trusted material handling equipment dealer in New York, Connecticut, and Western Massachusetts.
